Research Interests

My research interests are in developing algorithms and mathematical models for understanding biological processes, in particular those related to disease. There are many challenges in analyzing modern biological data sets e.g. scale (every genome is $> 1\text{Gb}$ of information), the relatively low signal-to-noise ratio, and the complexity of biology. As a result, it is imperative that new approaches utilize both biological and quantitative methods and expertise. My goal is to be at the heart of this process, and to develop new methods and algorithms that are efficient, scalable, and easy-to-use (by biologists and computer scientists alike), but that capture the complexity of biological processes.

Education

Ph.D., Computer Science and Computational Biology, Brown University *Expected May 2016*

Advisor: Associate Professor of Computer Science Benjamin J. Raphael.

M.Sc., Computer Science, Brown University *May 2013*

Advisor: Associate Professor of Computer Science Benjamin J. Raphael.

Thesis: *Methods for Identifying Driver Pathways in Cancer.*

B.Sc. (cum laude), Computer Science, Tufts University *May 2011*

Minor: Political Science

Advisor: Assistant Professor of Computer Science Benjamin J. Hescott.

Thesis (*highest honors*): *Inferring Mechanisms of Compensation from E-MAP and SGA Data Using Local Search Algorithms for Max Cut.*

Honors / Awards

Selected to attend Heidelberg Laureate Forum (one of 200 students), 2014.

NSF Travel Award (RECOMB 2013).

National Science Foundation Graduate Research Fellow, 2012-present.

Tufts University Senior Thesis in Computer Science completed with Highest Honors, 2011.

Runner-up for Computing Research Association Outstanding Undergraduate Award, 2011.

Tufts University Senior Award: Benjamin G. Brown Scholarship for Promise in Scientific Research, 2011.

Designed and implemented <http://TuftScopeJournal.org>, winner of 2010 Tufts Campus Innovation and Imagination Award.

Recipient of research grant from Tufts Undergraduate Research Fund, 2008 and 2010.

Research Experience

National Science Foundation Graduate Research Fellow/Graduate research assistant 2011-present

Department of Computer Science and Center for Computational Molecular Biology, Brown University

Advisor: **Dr. Benjamin J. Raphael.**

- developed algorithms for distinguishing the driver mutations that cause cancer from the random passenger mutations that have no effect for cancer;
- these algorithms include Multi-Dendrix and CoMEt, which identify mutually exclusive sets of mutated genes in cancer, and HotNet2 for finding significantly mutated subgraphs of protein interaction networks;
- member of The Cancer Genome Atlas's acute myeloid leukemia, pan cancer, and stomach adenocarcinoma analysis working groups.

Undergraduate research assistant

2008-2011

Department of Computer Science, Tufts University

Advisors: **Dr. Benjamin J. Hescott** and **Dr. Lenore J. Cowen.**

- analyzed genetic mechanisms of compensation in baker's yeast;
- implemented an algorithm for scoring putatively compensatory sets of genes using microarray expression data;
- developed an algorithm for identifying putatively compensatory sets of genes from high-throughput pairwise epistasis data.

Research assistant

2007

Molecular, Cellular, and Developmental Biology Department, Yale University

Principal Investigator: **Dr. John Carlson**

- assisted with research of the fruit fly olfactory system;
- performed larval behavioral assays under the supervision of Denis Mathew.

Teaching Experience

Guest lecturer

Fall 2014 Computational Molecular Biology (CSCI1810) Brown University two lectures

Professional Experience

Software Development Engineer Intern

Summer 2014

Amazon Web Services

Professional Service

Referee

Intelligent Systems for Molecular Biology (ISMB) conference: 2013.

Research in Computational Molecular Biology (RECOMB) conference: 2013-2015.

Bioinformatics–Oxford Journals: 2012, 2014-2015.

Professional Memberships

International Society of Computational Biology, 2012-present.

Association of Computing Machinery, 2014-present.

IEEE, 2014-present.
